

# my PERSONIFY Workplace

An app fit for today's employees

Connect with your space and colleagues for a unique employee experience

- Quickly locate your position and navigate around the premises with visual maps and wayfinding services (turn-by-turn navigation).
- Find and reserve available meeting rooms or office spaces.
- Directly modify the comfort parameters of your workspace: adjust temperature settings, dim the lights, or open/close sunblinds.
- Report an incident in the office like a defective printer, or loose carpeting using the integrated ticketing system. Even easier, take a picture of the incident and send it with the report.
- Stay up to date on all the latest news, events, and more by accessing the company news feed.
- Organize events and connect with your colleagues by organizing a potluck lunch at the office or coffee run at the local coffee shop.
- Create your own icon with a link to your favorite website (news, transit schedules, traffic report).
- Easily customize the app with your own logos, colors, and background image to reflect your business branding.
- Configure parameters through the Cloud and manage personal information via Office 365 for secure authentication, without storing on your server.
- Leverage the Distech Controls' building management system (BMS) via BLE, offering a simple and secure way to interface with systems on separate IT/OT networks.

# my PERSONIFY Workplace

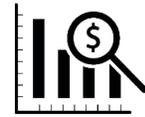

In a firm with  
250 employees

With 47 work  
weeks per year

70% of employees  
spend up to 15 minutes per day  
searching for a space to work

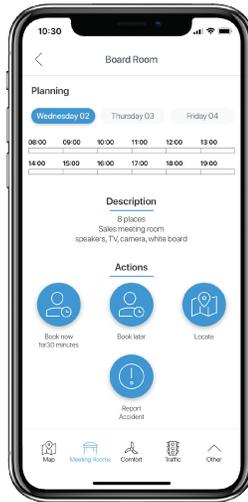

10280 hours  
of productivity  
lost per year
